Abdulrahmon Adenuga

cladeadenugar@gmail.com

Lagos, Nigeria.

SUMMARY

Dynamic web development specialist with four years of hands-on experience in crafting scalable solutions. Proficient in front-end and back-end technologies. Collaborative and innovative problem solver.

Portfolio - Nugar.dev

EXPERIENCE

Frontend Developer

Bloom Digital Media, Abuja, Nigeria

06/2022 - 09/2023

As a frontend developer at Bloom Digital Media, I played a pivotal role in constructing and managing the company's platform digital media services. My responsibilities included designing and implementing key features with a keen eye on SEO optimization, ensuring our offerings achieved a prominent and discoverable online presence.

Software Engineer Intern

Ministry of science and technology, Lagos, Nigeria

07/2023 - 11/2023

During my time at the Ministry of Science and Technology, Lagos State, my responsibilities included assisting in the development and maintenance of software solutions, participating in coding and debugging activities, and collaborating with the team to contribute to technological advancements in support of the ministry's initiatives.

Web Developer

RapidSwap

10/2022 - 06/2023

My responsibilities at RapidSwap included designing and developing both frontend and backend components for cryptocurrency-related applications. I implemented features, ensured system functionality, and collaborated with cross-functional teams to enhance the overall performance of web-based tools in the crypto domain.

SKILLS AND TECHNOLOGIES

- **Languages:** HTML, CSS, SCSS, TailwindCSS, JavaScript, TypeScript, React.js, Next.js.
- **Version Control:** Git.

- **Server-side Technologies:** Node.js, Express.js.

EDUCATION

Bachelor of Science in Computer Science
University of Ilorin, Ilorin, Kwara, Nigeria
October 2019 - August 2024
Attended the University of Ilorin from October 2019 to August 2024, earning a Bachelor of Science degree in Computer Science.

PROJECTS

1. **Bezal web forum**

   A web forum for digital creators to share their work, collaborate with other creators, and monetize their posts. This platform allows users to showcase their projects, share knowledge, and engage in meaningful discussions with like-minded individuals. I incorporated features like user profiles, real time messaging and notifications, post monetization, creating a seamless experience for the digital creator community. [Link here](#)

2. **Bloom Digit Media**

   A digital media services platform that enables content creation, distribution, and management while providing analytics to track performance. The platform allows users to publish across multiple channels and optimize their digital presence efficiently. [Link here](#)

3. **Doshpay**

   A landing page for a fintech platform that effectively communicates the bank's services, highlighting key features and benefits in a clear, engaging manner to attract and inform potential users. [Link here](#)

4. **Cryptracker**

   A dynamic cryptocurrency tracking platform that provides users with live updates on market prices. The platform allows users to build and customize their own watchlists, helping them track specific cryptocurrencies that matter most to them. I implemented real-time data updates and advanced analytics tools, ensuring a highly interactive and responsive experience for users. [Link here](#)

5. **Super Rare**

   A landing page for an NFT project, incorporating cutting-edge design elements and engaging content to attract potential investors and collectors. I also implemented responsive design principles for optimal viewing across various devices. [Link here](#)

6. **Seraph Festival**

   A platform catering to the Christian community, facilitating seamless registration for upcoming festivals. I also created an event management process for effortless registration and unique identification generation. [Link here](#)
